TITLE : INK JET RECORDING SHEET

ABSTRACT : PROBLEM TO BE SOLVED: To provide an ink jet recording sheet, in which an age bleeding does not develop even when stored for a long time under high temperature and highly humid environments after printing, and the fading of an image record with the can be prevented from developing due to excellent ozone resistance 3 and, at the same time, which is excellent in the light resistance of an image part.

SOLUTION: This ink jet recording sheet includes at least one kind in manganese compounds. Further, at least one kind in metal compounds except the manganese compounds or at least one kind of amine-based, sulfur-based, phosphorus-based or phenol-based fade proofing agent is preferably included. As the suitable manganese compound, manganese (II) acetate and manganese (III) acetate are employed.
